

WRITE + CURRENT FLOW

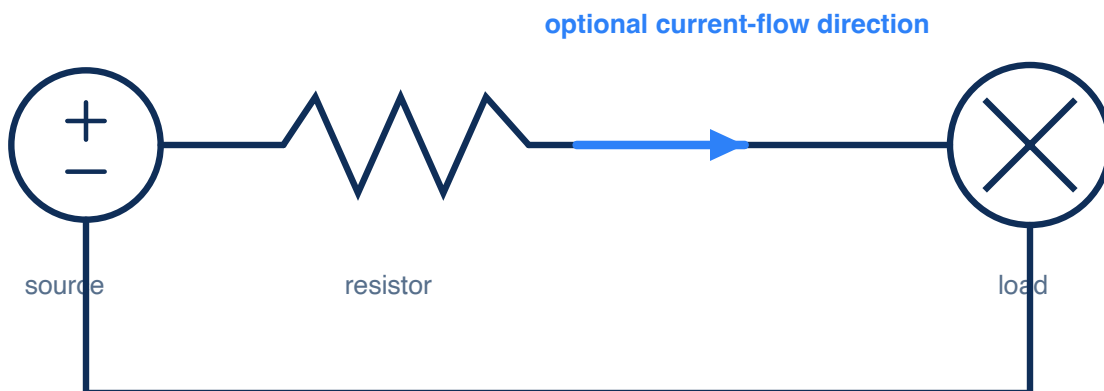

Circuit and annotation test

Suggested review steps

- ☐ Choose a pen and add a short handwritten mark anywhere on this page.
- ☐ Choose Current Flow, draw over a circuit wire, then continue writing without waiting.

Original simple circuit

Use this drawing only to try a pen mark or a current-flow path.

Annotation space

Try a handwritten note, a lasso selection, or a component placed beside the circuit.

CONTINUOUS PDF CANVAS

Scroll and annotate across pages

Import this three-page PDF. Keep a pen selected, annotate in the box below, then scroll down to Page 3 and continue in its matching box.

Page 2 annotation area

Write "TOP" or make any simple mark here.

Continue scrolling to Page 3

The same imported document should remain open as one continuous canvas.

CUSTOM EXPORT

Verify an export page range

After making optional marks on this fixture, use Export to create a PDF.
Select a page range and confirm the output contains the chosen pages.

PAGE 1

Single-page export

☐

Try this range

PAGES 2–3

Two-page range export

☐

Try this range

ALL PAGES

Full three-page export

☐

Try this range

Suggested verification☐

Export Pages 2–3 and confirm the resulting PDF has two pages.

☐

Export all pages and confirm the resulting PDF has three pages.

This fixture is intentionally original and contains no personal information.
